

Internship

(full or part time – 3 months – Unpaid for credit)

Challenges you will solve:

- You will support our research projects focusing on: Social CRM, Artificial Intelligence in CRM, Blockchain, Social Informations Systems or Data privacy
- Research and preparation of presentation content and formats
- You will support the event and project management (e.g. project-specific events)
- Cultivation of contacts with project partners

Why you would fit this position:

- You are studying Business Administration, Information Systems, Computer Science or comparable courses
- You are curious and have fun in dealing with new technologies.
- Knowledge or experience in related topics of Social CRM such as IT, law, sociology or marketing, are an advantage
- You speak English fluently (German is a plus)
- You are creative and able to work independently.

What you can expect:

- Enjoy the environment of a fast-growing research organization
- Work in a motivated and ambitious team
- Enjoy our time flexibility and choose your working hours
- Challenging professional and personal responsibilities
- Topic Identification for bachelor or master thesis

Who we are:

The Social CRM Research Center e.V. is an independent, non-profit institute headquartered in Leipzig, Germany. We work on publicly and privately funded research projects by connecting researchers, companies, system providers and students. Our aim is to develop and transfer multidisciplinary expertise on methods of customer relationship management.
